

Research Associate 7650 (Non-Exempt)

Research Associates engage in research on sponsored or other research projects under the supervision of faculty or other research staff and may lead lower-level professional and technical support staff in complex research. Appropriate activities include field data analysis, coordination of research projects, creatively and independently establishing project objectives, completing difficult assignments by demonstrating full competency in one or more areas of investigation.

Minimum qualifications include specialized skills in a related scientific area, and a Ph.D.
