Course and Program (Delivery) Equivalency Policy

Online education courses and programs will adhere to the same academic standards, policies, and rigor as those offered on campus. The programs and courses offered via online technology must be approved through the same curriculum approval processes as campus-based courses and programs; comparable in quality and content with the same course description and student learning outcomes; and assessed and evaluated on a regular basis. Curricula for online learning offerings should be coherent, cohesive, and comparable in academic rigor to curricula offered in traditional instructional formats. Each academic unit will establish a procedure for monitoring compliance with this policy and be able to report these findings to the Provost on a semester-by-semester basis.
