The Cleveland College Overland Park Health Center, located on campus, provides care to thousands of patients each year. Student interns treat a variety of health issues at the health center, which provides a wide-range of clinical experiences. The training received in an actual clinic environment is crucial to the development of our students both personally and professionally. Time spent in the clinic can lead to other opportunities, including internships at other health care facilities that have agreements with the College. As a result, the student receives a balanced education both inside and outside the classroom.

Just a few of the services offered by the Health Center include:

- Affordable care for patients
- Chiropractic adjustments for people of all ages both young and old
- Therapy/rehabilitation for athletes of all ages
- Sports physicals at competitive prices.
- Free and community wellness seminars & health fairs
